**DEFINITION**

Intensive Home-Based mental health Services (IHBS) are mental health rehabilitative like services provided to members of the Katie A. Sub-Class when needed. IHBS are individualized, strength-based interventions designed to ameliorate mental health conditions that interfere with a child/youth’s functioning and are aimed at helping the child/youth build skills necessary for successful functioning in the home and community. IHBS is also available to improve the family’s ability to help the child/youth successfully function in the home and community. IHBS services are offered to clients with significant and complex functional impairment which call for a higher level of intensity and must be focused on treatment goals identified by the Child Family Team (CFT). Predominantly delivered in the home, school or community and outside an office setting. IHBS are provided to child/youth’s family for usually less than 90 minutes. This time does not include documentation and/or travel time.
