

Please answer each of the following questions thoughtfully. This worksheet is here to provide you a place to record your thoughts by hand. If you prefer, feel free to copy and paste the questions into a word document and type your responses - or do anything else that makes it easy for you! You will turn in your responses at the beginning of JISTA Day 2 on Monday, September 17. Please contact Anne Curtis at acurtis2@sdsu.edu if you have any questions. Thanks for your time and thought.

I. Reflections on JISTA Day 1:

What was the most helpful (presentation, concept, question, etc) from Day 1? Why?

What was the least helpful (presentation, concept, question, etc) from Day 1? Why?

What was the most surprising? Why?

What are 2-3 questions that you want us to discuss that you did not already write on an index card in class?

II. Program Self-Assessment: Communication and Assessment

Describe the processes by which you gather information about people entering your program. What information do you request from the participant? From other agencies or individuals? (for standard assessments, etc. just list the name.)

If new participants have justice-involvement, how do you know?

What, if any additional or different information do you request for participants with justice involvement?

What information do you not currently get that you believe would be helpful? How would it inform your treatment planning or delivery? What are the current obstacles to receiving this information?

III. Program Self-Assessment: Needs

Review the notes you took during the intention setting activity at the beginning of Day 1. What are the key areas in your program where you want to create a process improvement plan for serving people with justice involvement?

What are the current internal and external challenges for these processes?

What will get better as a result of implementing the plans you create during JISTA?

IV. Networking

Please bring 30 business cards.
