Spotlight

April 2019

- Customize the **SchoolLink brochure** for your school(s).
- Place **SchoolLink posters and brochures** in key locations where staff and families gather.
- Check and replenish **SchoolLink posters and brochures** periodically.

Did you know there is a new California law (AB2022), effective January 1, 2019, that requires the education system to inform pupils and parents/guardians on how to initiate access to available pupil mental health services on campus or in the community? SchoolLink and school staff may use the SchoolLink posters and brochures to fulfill this requirement and increase awareness about SchoolLink services.

The SchoolLink **poster** details the pathways to youth behavioral services in San Diego County. The SchoolLink **brochure** provides standardized, simple language on services and eligibility and is customizable for each school and SchoolLink provider.

To download the SchoolLink poster and brochure, go to <https://theacademy.sdsu.edu/bheta-schoolink/> and click on the Resources module.

Note: The County is working on translating the SchoolLink poster and brochure into the threshold languages. The new versions will be ready before the 2019-2020 school year.

Please contact your supervisor with any questions. The County COR is also available to provide Technical Assistance through your Program Manager.

Thank you for all that you do for San Diego kids!
