

California APS Consistency in Determining Findings Multi-Module Virtual Skill Building Training

Description

In this engaging advanced virtual training, participants receive the opportunity to build upon the foundations learned in the prerequisite eLearning and practice determining findings to create consistency throughout the state. It is packed with practice scenarios to help participants work through the **California APS Standards for Consistency in Determining Findings Matrix** and better understand the findings standards set forth in the **Guiding Principles for Consistency in Determining Findings**. Participants will also have an opportunity to write findings in rational narrative, providing a framework for presenting logical justification for findings.

This course has been developed as a blended learning composed of an eLearning and two virtual modules, including individual practice. Participants will first complete the eLearning to gain the foundation needed for the virtual skill-building modules.
