

Relapse Prevention Skills Training

Trainer: [Terri Garcia, B.S., CADC III-CA, SUDC III,CS](#)

Course Code: BH0208

Course Description

Relapse Prevention is an important tool when working with people living with substance use disorder. In this interactive virtual training, learners will gain practical tools to guide individuals maintaining their recovery in both one-on-one and group settings. Examples and discussions will be centered around identifying high risk situations, removing barriers, increasing self-efficacy, and providing quality care both in-person and via telehealth services. The course is formatted for an interactive virtual setting, which allows for small group interactions. Learners will be guided through a series of discussions, case vignettes and will work together to create a relapse prevention plan.

Prerequisite: *Overview of Relapse Prevention BHE0095*

See Page 2 for Outline and Learning Objectives

Audience

All SUD counselors, case managers, therapists, and other direct service providers working within the behavioral health system of care.

Location

Live Virtual Training:
This training will be conducted via [Zoom](#).

Date

September 30, 2021

Time

9:30 am to 12:00 pm & 1:00 pm to 3:30 pm

Learning Objectives

Upon completion of this training participants will be able to:

- Identify Relapse Prevention skills to use with an individual in SUD treatment services in person, telecommute and telehealth
- Apply relapse prevention strategies in both individual and group telehealth settings for substance use disorder treatment
- Describe cultural considerations for Relapse Prevention
- Identify cognitive distortions and automatic thoughts that create high-risk situations for substance use during and after pandemic
- Identify your own personal biases and stigmas related to substance use and how they may be triggered during this challenging time
- Demonstrate techniques through the development of a Relapse Prevention Plan that will remove barriers and increase an individual's self-efficacy
- Develop a person-centered relapse prevention plan that can be used in all situations
